

Biography

Sanjeev Krishna is Professor of Molecular Parasitology and Medicine at St George's University of London. He completed degrees at Cambridge and Oxford, and studied malaria in Thailand. A former Wellcome Trust Senior Research Fellow in Clinical Science, he joined St George's in 2000. He was elected a Fellow of the Academy of Medical Sciences in 2004 and awarded an ScD by the University of Cambridge in 2007.

Professor Krishna maintains a wide-ranging programme of research spanning basic research into the function of *Plasmodium* transporters and their value as drug targets. He has identified mechanisms of drug resistance and novel diagnostic approaches for parasitic and other infections. Clinical studies have improved treatments for malaria by simplifying regimens, and validating different routes for administration. He has studied the emergent infection caused by *P. knowlesi* in Malaysian Borneo.
